

# TerraCycle Business Management Internship

Name of Company/Organization: TerraCycle

Internship title: Business Management Intern

Compensation: unpaid

Placement: Fall (Sept-Dec), Spring (Jan-April), Summer (May-Aug)

Nature of organization:

*TerraCycle's purpose is to eliminate the idea of waste. We do this by creating national recycling systems for the previously non-recyclable. The process starts by offering collection programs (many of them free) to collect your waste and then convert the collected waste into a wide range of products and materials. With over 14 million people collecting waste in 11 countries together we have diverted billions of pieces of waste that are either upcycled or recycled into over 1,500 various products available at major retailers ranging from Walmart to Whole Foods Market. Our hope is to eliminate the idea of waste by creating collection and solution systems for anything that today ends up in our trash.*

Duties of intern:

TerraCycle's programs engage tens of thousands of schools and organizations in diverting tons of waste. Specific duties of interns in the Brigades department will assist in the administration of the Brigades, from general office tasks to special projects. Past interns have developed marketing campaigns, conducted community outreach, completed research projects, and developed materials for distribution to TerraCycle's Brigade participants.
