EDUC	556	Science of Reading Overview	3
EDUC	557	Wilson Reading System Intro	3
EDUC	558	WRS Intensive Instruction	3
EDUC	559	WRS Steps 1-6 Practicum	3

Program Objectives

Upon completion of the Wilson Reading Level I Certificate, candidates will be able to:

1. Demonstrate knowledge of structured literacy and the science of reading by explaining the linguistic, cognitive, and developmental processes that underlie reading and spelling acquisition.
2. Implement evidence-based instructional practices aligned with the Wilson Reading System with fidelity, including explicit, systemic, and multisensory approaches to teaching phonological awareness, decoding, encoding, and fluency.
3. Analyze and apply literacy assessment data to identify student strengths and needs, particularly for learners with dyslexia and other language-based learning disabilities, and to inform targeted instructional planning.
4. Demonstrate effective, reflective instructional practice in supervised settings by delivering structured literacy instruction, monitoring student progress, and adjusting teaching based on data and feedback.
